DELIVERABLE 6.2.: Website of the project

**NOISEFREETEX: DEMONSTRATIVE SOLUTIONS TO REDUCE NOISE
POLLUTION IN INDUSTRIAL AREAS, USING FINISHING TECHNOLOGIES
IN TEXTILE MATERIALS**

In this deliverable, it is intended to explain the project website created by AITEX (with the collaboration of all partners): <http://noisefreetex.aitex.net>

AITEX (with the collaboration of all partners) has created the **project website** on February 2011:

- Available nowadays in English except the project abstract which is in Italian and Spanish languages
- The web includes a restricted area for partners and the Commission, where information and documents are uploaded. Each partner has one login and password of this restricted area. One for instance is: **Login: kmolla. Password: aitex123**
- All Deliverables, Reports, etc. are available in this section.
- The web also includes other sections: **Project** (explaining the objectives, actions and means involved, expected results, **links** to the partners websites, to the LIFE website , ETC.), **Workplan**, the **Consortium** (info about the partners,), **News and Events** where the project progress can be found , a **Progress and Results** section, where the progress of the different actions are explained and a **Dissemination Section** (where the dissemination documents created in the project are uploaded: posters, photos, leaflets etc) and also the public deliverables.

The web has received 4767 visits since it was created and here below, we can see the number of visits of each section:

- Main page	4767
-Overview	606
- News & events	581
- Public Documents	829
- Progress and results	311
